

# The Living Systems of the Oneida Reservation

Tsi? yukwahsi?takvsláhkww tsi? yukwanaklasla.yV. Onvyote?a.ká.

The following ten chapters describe the past efforts and future goals of important natural resource concerns of the Oneida Nation. A management team signed a charter for the Live, Sustain, Grow project in 2009 and defined the desired outcomes of the project. A core team worked from 2009–2011 to follow through on this guidance, in collaboration with the results from the community survey, and drafted the plan with authors from the diverse Oneida areas of:

- Division of Land Management
- Community Integrated Food Systems
- Environmental, Health & Safety Division (EH&SD)
- Planning Department
- Cultural Heritage Department
- Environmental Resource Board

For each of the natural resource chapters, the following framework is utilized to order the information:

Resource History  
Resource Description  
Community Suggestions and Feedback  
Goals and Objectives  
Benefits Assessment  
Implementation Plan
