

## ENG# 15-005 - Oneida Fishery Restoration Phase II

## Project Description:

The Oneida Nation is in the process of expanding the existing lake to provide a sustainable fishing source and a recreational area for its members. Oneida Lake is approximately 18- acres. The proposed expansion is approximately 12 acres, increasing the total area of Oneida Lake to an estimated 30- acres. The proposed lake expansion will provide additional fishery and recreational activities for tribal members. As part of this expansion, an access road will be constructed to provide access for construction activities, lake expansion and the future fish camps. The project includes the clearing and grubbing, excavation, roadway construction, 42-inch & 54-inch diameter culvert pipes, biofilter construction, landscaping and modifications to the existing parking lot.

## Current Status:

All major project activities are complete.

Due to the desired planting window, the remaining arborvitae plantings for the Fish Camp site's will be installed in Spring of 2022. Conservation will install the remainder of the site signage and Picnic tables in Spring 2022, once weather permits.
