2022 Comprehensive Community Health Assessment

Description

We are excited to present the 2022 Oneida Community Health Assessment. This comprehensive health assessment was created with data collected through health surveys and community focus groups to best understand the health needs within the Oneida Community. The data presented in this health assessment will help identify the areas of health that need attention and improvement over the next 5 years. The goal of this plan is to help inform decision making around the health programs and services offered in the community, leading to improvements in the overall health and wellbeing of the Oneida Community for future generations to come.

Requested Action

Request to provide a brief overview of the report and where to find it on the website.

Needs your input!

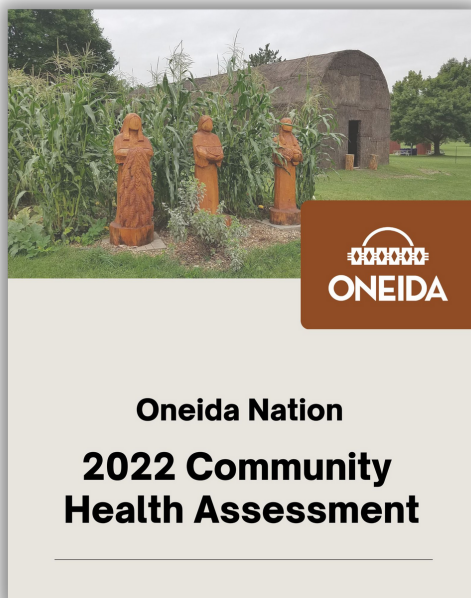

In Spring of 2022, a health survey was sent out to all Oneida Enrolled Tribal Members living in Brown & Outagamie Counties. With the data collected from that survey - along with additional data sources, the Oneida Community Health Services Department worked to put together a Comprehensive Community Health Assessment.

The assessment is now complete and ready for you to view!

After reviewing the assessment, the Oneida Community Health Services Department is asking for your assistance on deciding which areas of health to prioritize over the next 5 years.

There will be a link to a survey at the end of the assessment for you to vote on your top 3 health priorities for the community.

Please provide feedback by April 15th!
