

CDC# 21-112 - Transitional Residential Detox Treatment Facility

Project Description:

The purpose of this project is to conduct a feasibility study to understand the potential for the Oneida Nation to operate their own detox and/ or transitional living facility. Services include conducting a market analysis, financial analysis, and feasibility study for addiction recovery services including detoxification treatment, transitional/residential housing, and associated behavioral health providers for the community Oneida’s Comprehensive Health Division serves.

The Engineering Department has contracted with two Consultants to complete the feasibility study.

- Wipfli, LLP. - Wipfli will create a feasibility study to assess the level of support and anticipated financial results of Oneida offering these services, and ultimately if the project makes sense for Oneida to undertake.
- DSGW Architects - DSGW will provide facility programming services that correlate with the feasibility study services Wipfli, LLP is performing

Current Status:

Project kick-off meeting was held on February 2nd to begin project discussions and planning engagement. The project client is currently working on providing data for the Feasibility study along with scheduling interviews.

Schedule:

Approvals - Complete
Feasibility Study – TBD
