

Opioid Overdose Kits Available

WHAT IS NALOXONE/NARCAN?

Naloxone is a medication designed to block or reverse the effects of opioid medication, including extreme drowsiness, slowed breathing, or loss of consciousness.

An opioid is sometimes called a narcotic. NARCAN® Nasal Spray counteracts the life-threatening effects of an opioid overdose.

Since most accidental overdoses occur in a home setting, Naloxone/Narcan was developed for first responders, as well as family, friends, and caregivers, with no medical training required.

Be advised this intervention is only short lasting and 911 must be called immediately
