

## CDC #21-112 - Transitional Residential Detox Treatment Facility

### Project Description:

The purpose of this project is to conduct a feasibility study to understand the potential for the Oneida Nation to operate their own detox and/ or transitional living facility. Services include conducting a market analysis, financial analysis, and feasibility study for addiction recovery services including detoxification treatment, transitional/residential housing, and associated behavioral health providers for the community Oneida's Comprehensive Health Division serves.

The Engineering Department has contracted with two Consultants to complete the feasibility study.

Wipfli, LLP. -

Wipfli will create a feasibility study to assess the level of support and anticipated financial results of Oneida offering these services, and ultimately if the project makes sense for Oneida to undertake.

DSGW Architects -

DSGW will provide facility programming services that correlate with the feasibility study services Wipfli, LLP is performing

### Current Status:

Both Consultants have completed their contracted services. The project team has an upcoming meeting to discuss next steps for the project.
