

ENERGY SOCIAL

TOPIC: BIG SOLAR AND ECO-SYSTEM SERVICES

What are Eco-System Services?

Ecosystem services are the benefits that humans and other species receive from forests, wetlands, grasslands, streams.

What's Big Solar?

*Big solar are solar projects that are 10 acres or larger.
Oneida Nation is considering building big solar on Tribal land. What's your opinion?*

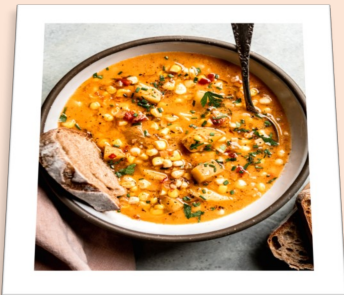

Why do we care?

We want to understand how solar projects can be designed to improve eco-system services and provide more benefits to the Oneida community.
