Welcome to Our Bitsy Game Showcase!

This game was created during the Fall 2025 Homeschool Program at the Oneida Community Library, where creativity, culture, and coding came together in a unique learning experience. Using the Bitsy game engine, our homeschool students: Tehakahliyose, Vacili, Paxton, Hawi, and Sommer each designed their own character, item, background, and tile, and wrote original dialogue to bring their creations to life. Under the guidance of Eliza Skenandore, who led all instruction and coding for the game development lessons, students explored storytelling, visual design, and interactive media while celebrating their individuality and imagination.

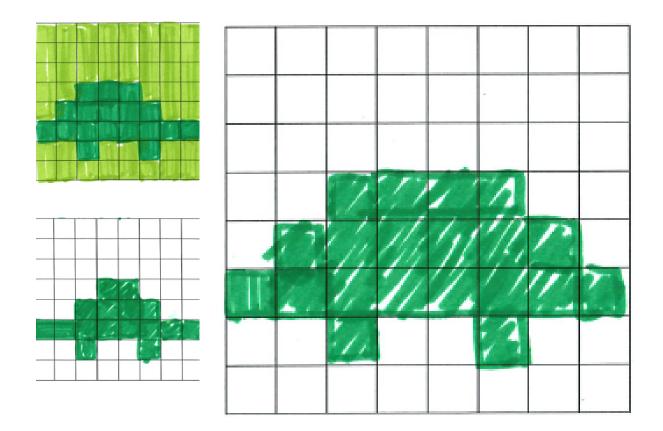

This booklet showcases the collaborative spirit and creative work of our young designers. We hope you enjoy exploring their world as much as we enjoyed building it!

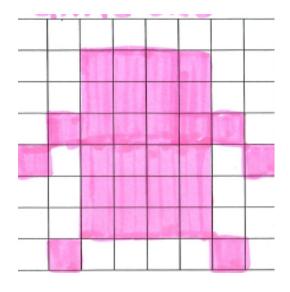

Our Stories

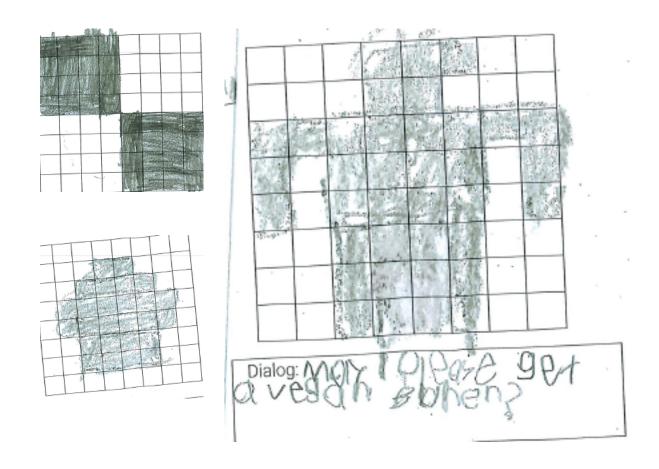

Part of the Homeschool
Program students were
told some of our oral
stories. While they
listened to our
stories we hand some
hands-on learning.

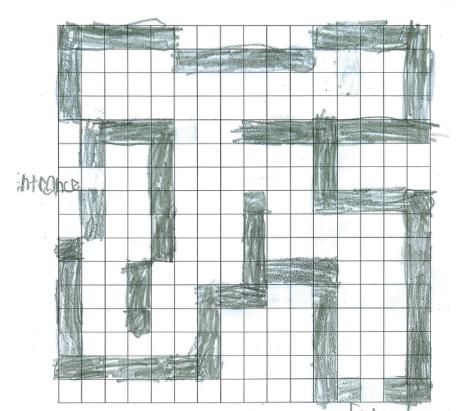

These examples were created to show that there is no one way to create something. Also, to give the youth examples of using the space and block for design.

Examples by Eliza Skenandore

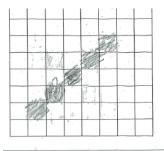

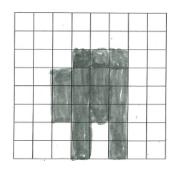

On a mission for a vegan burger!

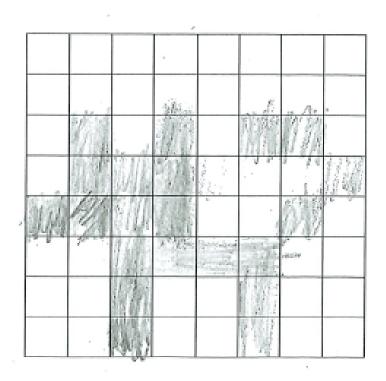

Vacili

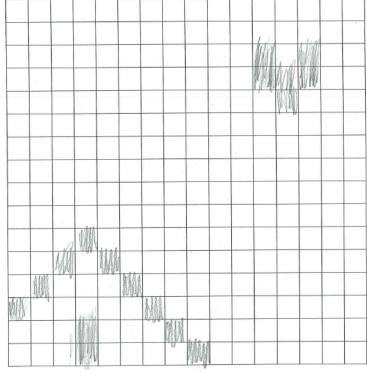

Dialogyou found a stick for woofly!

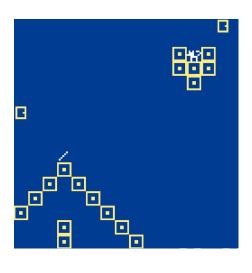

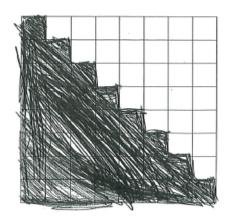

Name: WOOFLE

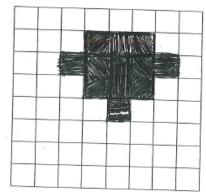

Finding a stick for Woofle

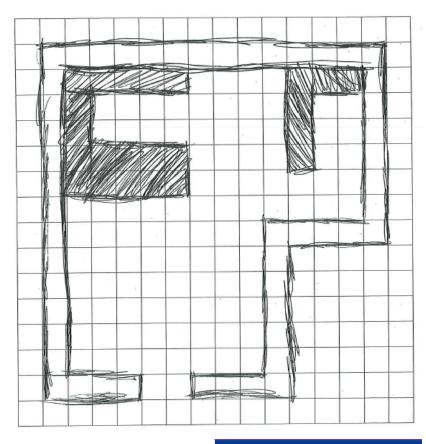

Sommer

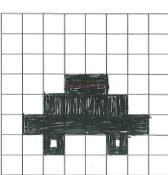

Your Character

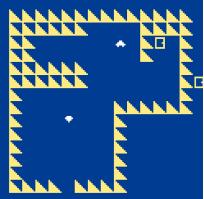

<u>Jemonian</u>
