

****NOTICE****

During 2025 & 26 season(s) there had been numerous complaints regarding individuals driving on property for a variety of activities, this includes hunting on land owned by the Oneida.

Please be mindful that NOT all the fields and/or properties, particularly agricultural fields, are void of crops or established plantings. The Oneida Nation has several agricultural fields being utilized by the Oneida Nation Farm (ONF), Tsyunhehkwa Farm (TSY Farm), and private tenants leasing agricultural property. The ONF, TSY Farm, and Ag tenants are conducting a common practice of planting cover crops during the cool/cold season months.

This can entail seedling or established plant growth prior to the snow cover, and traffic on or during this time can negatively impact the cover crop. The Nation also has numerous properties that have restoration effort designations or protection guidelines with specific agencies, which call for restrictions on land uses. To ensure that these requirements are being met, individuals conducting these illegal activities (example: driving across fields, driving off established lanes, etc.) will be cited for any/all violation(s) that occur on these lands.

Violation =

52. Damaging property, Agricultural Crops, Or Restoration Areas.

Sanction =

1st violation - \$300.00 fine and loss of license for one (1) year, Total damage assessment costs.

2nd violation - \$600.00 fine and loss of license for Two (2) years, Total damage assessment costs. Questions regarding permission to access a property:

Oneida Nation Farm (920) 833-7952

Division of Land Management (920) 869-6500

Tsyunhehkwa Farm (920) 370-3151

This notification is being provided and ALL agricultural tenants/lease holders, along with the ONF and TSY Farm. Staff are being informed to contact the Oneida Conservation Department or the Oneida Police Department to report any/all illegal activities.

The Nation has established contracts with numerous tenants/lease holders and other agencies, as well as the efforts of both the ONF and TSY Farm, for the use of the land. The Nation wants to ensure that no activities conducted on agricultural, or any tribally owned lands are jeopardizing these lease agreements or damaging lands under specific contracts. The purpose of this notification and enforcement action is to maintain our long-term relationships to our community, respect current agricultural lease/land agreements, and protect the Nation's obligations. Your cooperation and assistance are a benefit to not only the land, but everyone involved in the utilization of the land.

We are asking everyone to use the proper judgement, obtain permission, and utilize established laneways to access tribal property.
